Member of DJSI World, DJSI Europe

FOA Food Producers

Switzerland

Corporate Sustainability Assessment Results

Explanations:	Company Score	Average Score	Best Score	Lowest Score DJSI World	Lowest Score DJSI Europe	Lowest Score DJSI North America	Lowest Score DJSI Asia Pacific	Weightings of Dimensions or Criteria
The scores reflect the company's performance across economic, environmental and social criteria compared to its industry average, best and worst performing company in the company's industry. The values for the total score, the dimension and the criteria scores are on a scale from 0 to 100%. Their weightings as a percentage are shown in the last column. The DJSI Guidebooks on www.sustainability-index.com contain further information on the assessment methodology.	is the actual score of the company	is the industry group's average score	is the highest score reached by a company in the specific industry	is the lowest score of a DJSI World component in the specific industry	is the lowest score of a DJSI Europe component in the specific industry	is the lowest score of a DJSI North America component in the specific industry	is the lowest score of a DJSI Asia Pacific component in the specific industry	The weightings are displayed as a percentage of the total score.

Total Scores:

	Company Score	Average Score	Best Score	Lowest Score DJSI World	Lowest Score DJSI Europe	Lowest Score DJSI North America	Lowest Score DJSI Asia Pacific	
Total Score	79	50	83	65	74	69	49	

Dimension Scores:

	Company Score	Average Score	Best Score	Lowest Score DJSI World	Lowest Score DJSI Europe	Lowest Score DJSI North America	Lowest Score DJSI Asia Pacific

Labor Practice Indicators	75	63	85	64	70	64	65	5
Standards for Suppliers	99	50	99	65	75	65	37	7

Explanations:

The scores reflect the company's performance across economic, environmental and social criteria compared to its industry average (calculated as the average score of all assessed companies eligible for the DJSI World, regional indices or country indices), the best score in the company's industry and the lowest score of the worst performing Index member in the DJSI World and DJSI regional indices in that industry. The values for the total score, the dimension and the criteria scores are on a scale from 0 to 100%. Their standard weighting in the total score is shown in the last column. If the issue is not applicable to the company (i.e. it is not exposed to this source of risks or opportunity), the criterion score displays NAP ("Not applicable"). In such cases, the weight of the criterion shown in the last column has been redistributed equally onto remaining criteria within the same dimension before calculating the dimension score. As mentioned in the email information received on Sept. 3, the Operational Eco-Efficiency scores had to be adapted for the 2010 assessment.

Since the company was assessed last year, its 2009 score provides a good proxy of its Operational Eco-Efficiency performance, hence the 2009 score was awarded in the 2010 assessment.
