Changes to the Consolidated Financial Statements of the Nestlé Group 2005/6

The Group applies in 2006 the option of IAS 19 § 93A ss. whereby actuarial gains and losses are recognized in the period in which they occur in equity, but not in the income statement. This approach enables disclosure of the net of the fair value of the employee benefits assets and liabilities in the balance sheet. It also improves the comparability of Nestlé's results to those of its competitors. The Group also adopted IFRIC 4 on embedded leases in 2006. In accordance with standards, comparative information for 2005 has been restated.

Following the announcement made earlier this year, globally managed nutrition activities are now disclosed separately from the Zones. As a consequence, the 2005 segment information has been restated accordingly.

The third change made to the June 2005 figures relates to the adjustment of comparative figures following the discontinued operation that was announced in December 2005 for the Chilled dairy activities in Europe.

Finally, as a result of the repeal of the goodwill amortisation, EBITA (Earnings Before Interest, Taxes and Amortisation of goodwill) has been renamed EBIT (Earnings Before Interest, Taxes, restructuring and impairments)

A summary of the impacts of these changes for June and December 2005 is given below.
