

Note:

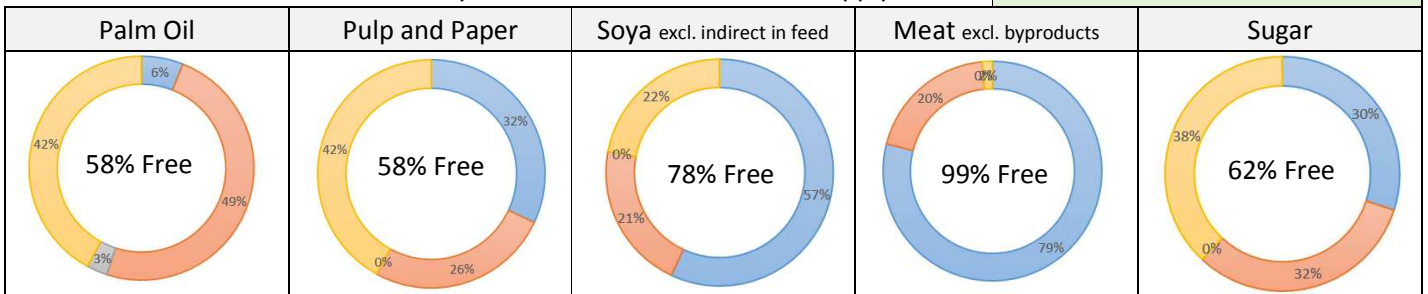

2020 No Deforestation Commitment

**Objective:**  
Provide an update on our status versus our 2020 no deforestation commitment.

**Background:** Since 2011 we trace ingredients and packaging back to origins and collaborate with 3<sup>rd</sup> party organizations [mainly NPOs/NGOs] to deploy large-scale activities and projects to transform the industry and clear deforestation from supply chains.

**Status = 63%**  
of Top 5 [deforestation related] category volume is Free From Deforestation

	Traced back to no risk or low risk locations, verified by on the ground 3 <sup>rd</sup> parties
	Traced back to medium or high risk locations, verified by on the ground 3 <sup>rd</sup> parties
	Traced back and monitored by Satellites Imageries
	Not Yet Traced - Deforestation Status Unknown

Disclaimer:

- This update is based on risk mapping combined with third party verification on the ground, and/or from the sky [satellites], using our traceability data back to farms as foundation.
- Traceability as per November 2017 supply chain-mapping refresh.
- These five categories cover 93% of the volume traditionally associated with deforestation.
