Total fresh milk volumes sourced in 2018: 6.5 Mio Tons

Notes:

Through our Farmer Connect program, we source from approximately 230 000 dairy farmers worldwide. Through this program, we help them address the challenges they are facing and improve the quality of the milk they produce.

As with any traceability efforts, this is a snapshot that reflects our supply chain-mapping efforts over the last years, updated in June 2019, which is a mix of self-declaration and paper based verification, and it should not be taken as fully exhaustive nor fully accurate as supply chain flows evolve on a daily basis.
