Santo	Vanuatu

Total volumes sourced in 2019: 41 000 tonnes

This represents a mix of coconut ingredients, coconut oil and coconut milk.

Notes:

Coconut was included in our Responsible Sourcing program at the beginning of 2019. We are currently working to map our supply chain. As of December 2019, we have traced 67% of the volume of coconut materials that we source back to the province and will continue to map these supply chains further. We will disclose our suppliers starting in 2021.

As with any traceability efforts, this is a snapshot that reflects our supply chain-mapping efforts over the last years, last updated in December 2019, which is a mix of self-declaration and paper-based verification, and should not be taken as fully exhaustive nor fully accurate as supply chain flows evolve on a daily basis. To the best of our knowledge, the information contained in this list is accurate and reliable as of the date of publication; however, we do not assume any liability whatsoever for the accuracy and completeness of this information. Therefore, no rights can be derived from this list.
