Total volumes sourced in 2019: 500 000 tonnes

Notes:

As with any traceability efforts, this is a snapshot that reflects our supply chain mapping efforts over the last years, last updated in April 2020 which is a mix of self-declaration and paper based verification, and should not be taken as fully exhaustive nor fully accurate as supply chain flows may evolve on a daily basis.

Note that primary processors are not necessarily owned by the corresponding direct supplier.
