

NESTLÉ'S NET ZERO ROADMAP

Our path to regeneration for future generations

Solving the problem means identifying the problem. We found Nestlé emitted 92 million tonnes of greenhouse gas emissions in 2018*. Now we know the extent, we know the road ahead.

*Total GHG emissions were 113 million tonnes (CO₂ equivalent) in 2018, 92 of which are in scope of our UN 1.5°C pledge.

Companies and their emissions grow over time. That's why we're promising to be net zero based on our 2018 baseline, no matter how much our company grows.

— Path to zero emissions by 2050
- - Business as usual

Emissions by operation
(million tonnes of CO₂e, 2018)

- 65.6 Sourcing our ingredients
- 7.0 Manufacturing our products
- 11.0 Packaging our products
- 7.5 Managing logistics
- 0.8 Travel and employee commuting

Moving faster

We're excited to hit the soil running. We're accelerating our work in manufacturing, packaging and carbon-neutral brands. We're also investing CHF 1.2 billion to help spark regenerative agriculture across our supply chain, as part of a total investment of CHF 3.2 billion by 2025.

Our milestones

- 🌲 100% deforestation free for primary supply chain by 2022
- ⚡ Switch our global car fleet to lower emission options by 2022
- 🌴 100% certified sustainable palm oil by 2023
- 🔋 100% renewable electricity in all our sites by 2025
- ♻️ 100% of our packaging recyclable or reusable by 2025
- ✅ 100% certified sustainable cocoa and coffee by 2025
- 🌱 Plant 20 million trees a year
- 🏠 Nestlé Waters becomes carbon neutral by 2025
- 🌿 Source 20% of key ingredients through regenerative agricultural methods by 2025
- 🗑️ Cut virgin plastic in our packaging by a third by 2025

By 2025, we will reduce our emissions by 20%

Scaling up

Further down the greener path, we will invest in new technologies and fundamental changes to our products and businesses around the globe.

- ☀️ Use more renewable thermal energy in our manufacturing
- 🌱 Source 50% of key ingredients through regenerative agricultural methods by 2030
- 🌳 Plant 200 million trees by 2030

By 2030, we will reduce our emissions by 50%

Delivering our promise

Advanced agricultural techniques will deliver a regenerative food system at scale, supported by zero emission logistics and company operations. We will balance any remaining emissions through high-quality natural climate solutions that benefit people and the planet.

By 2050, we will reach

net zero
