# Science for Better Nutrition

## Our Credo

By sharing science based information and education, the Institute fosters “Science for Better Nutrition” to contribute to the enhancement of the quality of people’s lives all over the world.

## Our Mission

The Nestlé Nutrition Institute shares leading science based information and education with health professionals, scientists, nutrition communities and stakeholders in an interactive way.

## Our Nutritional Resources

Scientific Workshops and Satellite Symposia / Medline Indexed Publication Series / Academic Fellowships / Nutrition Courses / E-Learning & Practical Tools. These resources are accessible via our interactive website

## Publications

The NNI is the world’s largest private publisher of nutritional information much of which is listed in Medline/PubMed as highly reliable reference of life sciences literature. As with all our resources, more than 3000 publications are available to the medical community at no charge.

# Connecting with the Medical & Scientific Community

[www.nestlenutrition-institute.org](http://www.nestlenutrition-institute.org)

The NNI website has been developed to provide the scientific, medical and nutrition community with easy access to the latest thinking, research and information on a wide range of nutrition and health related topics from pediatrics to geriatrics, sports nutrition to weight management and specific disease states.

Key resources available include:

**A vast library:** freely downloadable

**E-Learning opportunities:** for self learning or accreditation

**Online Conferences:** Access more than 400 webinars from global NNI workshops and symposia and learn about the most critical nutrition issues from the world’s leading minds.

**Practical tools:** A range of tools to help you assess and track nutritional aspects of your patients’ health.

**Regular updates via our newsletter and RSS feed:** As a registered member you will benefit from customised information, ensuring you always get the information you need.

**Social media:** Follow NNI on twitter and watch our videos on YouTube.

# One to One Exchange with Opinion Leaders

## Academic Fellowships

Since 2005, the NNI has granted more than 500 postgraduate academic fellowships to young medical doctors and scientists working in the area of nutrition and health through leading partner institutions, the majority of whom are now working in developing countries as a condition of our support.

## Congress and Satellite Symposia

At regional and international congresses, the NNI fosters exchange on nutritional and health related topics through sponsorship of satellite symposia and scientific lectures.

## Health Economics

Improving Public Health through nutrition is a cornerstone in the Nestlé Nutrition Institute mission. Health Economics is a science that assesses the Public Health impact and evaluates the effectiveness and the economic benefits of health interventions and nutrition. Health Economics translates health benefits into economic benefits which help Health Authorities and other stakeholders to choose the most cost-effective strategy for a public Health problem in their country or region.
